Figure 1: A dendrogram showing the hierarchical clustering of 55 Japanese universities. The dendrogram is rooted at the top and branches downwards. The names of the universities are listed on the left and right sides of the dendrogram, corresponding to the nodes. The numbers on the branches represent the distance or similarity between the clusters. The universities are numbered 1 through 55. The dendrogram shows that the universities are grouped into several clusters, with some clusters being more closely related than others. For example, the cluster containing universities 1 through 13 (including 九州学院, 専大玉名, 第1, 大津, 秀岳館, 文徳, 人吉, 水俣, 南稜, 八代農業, 熊本北, 球磨中央, and 学園大付) is closely related to the cluster containing universities 14 through 27 (including 玉名工業, 八代工業, 翔陽, 宇土北, マリス卜, 鹿本, 必由館, 八代清流, 鹿本商工, 熊本西稜, 北々, and 慶誠). The dendrogram also shows that the universities are grouped into several clusters, with some clusters being more closely related than others. For example, the cluster containing universities 28 through 41 (including 東海星翔, 開新, 玉名, 熊本商業, 真和, 天草工業, 熊本中央, 矢部, 東稜, 有明, 高専熊本, 阿蘇中央, 御船, and 熊本工業) is closely related to the cluster containing universities 42 through 55 (including 熊本国府, 上天草, 高専八代, 千原台, 熊本農業, 牛深, 八代池, 菊北, 芦北, ルーテル学院, 小川工業, 球磨工業, and 熊本). The dendrogram also shows that the universities are grouped into several clusters, with some clusters being more closely related than others.
